Training Today's Heroes.

Exterior Training Props

First responder training has become an issue of great financial concern in many departments. **PRO-SAFE** has developed a training device that is versatile and cost effective. Fueled with liquid or vapor propane our Six-zone control cart can effectively provide firefighters with a multitude of training scenarios.

The **PRO-SAFE** training system has the ability to be either fixed in one location, or to be completely mobile accompanied by a supplied power source, propane supply and trailer. Trainers can provide firefighters the opportunity to train using their own equipment effectively and with minimal costs.

PRO-SAFE designs and manufactures a wide range of high quality, safe, live fire props, which allows them to work with individual departments to construct any training scenario that they would like to accomplish.

Available props include: Pressure vessel props, car trainer, spill fire, Christmas tree or 3-D fire simulation, flange and leaking pipes, marine, rail, machinery fires and barrel storage. Custom props are also available.

Leading the way in professional Fire, Rescue & Emergency Training Equipment
