SCBA

Self-Contained Breathing Apparatus Mobile Training Unit

The **PRO-SAFE SCBA** confidence trainer is designed to provide realistic conditions for **SCBA** confined space training for municipal, industrial, airport and marine structural firefighting crews. The unit is completely self-sufficient with an onboard control room and generator. The maze is completely modular, allowing rapid reconfiguration of independent confined space areas. The maze modules are three wide and two high, allowing an observation area to be created either down the middle of the trailer or to either side; the maze options are virtually unlimited.

The **PRO-SAFE SCBA** Trainer is built in a 53' trailer with three tiers. The first two tiers are completely reconfigurable with removeable floor and obstacle wall panels to allow unlimited maze options. From the second tier, six removeable panels access the open third tier which can be used independently for search and rescue training. A smoke generator fills the trailer to zero visibility in about 45 seconds. From the control room, trainers can activate smoke, sounds and light (strobe, cd player and horn) to simulate the confusion and noise inside a collapsed or smoke-engulfed building. A rooftop access duct permits training for tripod recovery into a confined space shaft.

Leading the way in professional Fire, Rescue & Emergency Training Equipment

SCBA

Self-Contained Breathing Apparatus Mobile Training Unit

Standard & Safety Features

- ✦ 'E' stops at all doors
- ✦ Video monitoring & recording system
- ✦ Interior lights
- ✦ 3 Floors of reconfigurable 'mazes'
- ✦ Truss & Rafter prop
- ✦ 2nd floor platform for tripod recovery
- ✦ Smoke machine
- ✦ CD player with sound effects
- ✦ Horn/ audible disorientation
- ✦ Strobe light/ visual disorientation

Warranty & Support

- ✦ Delivery and testing by qualified technicians
- ✦ Detailed operation and maintenance training
- ✦ 12-month parts & labour warranty
